

Daniel Mann

Software Developer

Full-stack web developer with 4+ years of experience shipping production sites in Django, Python, React, and Node.js. Recently led the consolidation of 9 company websites into a single Wagtail CMS and built an AI feature that answers employee questions from 1,100+ internal pages and documents.

SKILLS

Python	JavaScript (ES6)	PostgreSQL	Next.js	HTML5
Django	React	Express.js	Tailwind CSS	UI Design
Wagtail	Node.js	Redux	Bootstrap	

EXPERIENCE

Web Developer

The Westervelt Company

01/2024 - Present

- Migrated the internal company website from **React** to **Django** with **Wagtail CMS**, backed by a **PostgreSQL** database
- Led the migration of **8 public-facing websites** into the same multi-site **Wagtail CMS**, unifying content management across the company and enabling non-developers to manage their own content, with ongoing fixes and features
- Built an **AI** feature in **Python** that answers employee questions in natural language using content scraped from the internal company site's 600+ pages and 500+ documents
- Gathering requirements from stakeholders across the company and translating them into scoped, deliverable features

Web Developer (Contract)

Relay

06/2023 - 01/2024

- Enhanced data monitoring efficiency by integrating the **Front-End** website with the **Back-End** CRM system, and administered seamless data synchronization, resulting in a marked increase in data tracking and accuracy
- Increased **WordPress** site indexability by a significant margin through plugins such as **YoastSEO**
- Designed and implemented a webscraping software tool using **Node.js**, **Express**, and **Cheerio** to effectively scrape and give reports on site structure and ensure all **SEO** best practices are met

Web Developer (Contract)

Innov8tive Strategies, LLC

07/2022 - 06/2023

- Collaborated with the CEO to improve company website **UI/UX design**, performance, and reliability
- Designed and implemented an **API** using **RESTful** services to enable real-time integration of a live Instagram feed
- Consulted with non-profit clients to grow their own web presence and, through that, their impact in the community

EDUCATION

University of Alabama at Birmingham

Bachelor of Science in Information Systems

- Project based learning through coursework with a strong emphasis on **leadership** and **teamwork** in a group setting
- Relevant coursework: Information systems design, Object-Oriented Programming, Data Structures and Algorithms, Software Development, Computer Science, Database Management Systems, CI/CD, Git, Responsive Web Design
